Summary

As a Front End Developer, I have enough knowledge of building or developing a responsive website. Proficient in HTML5, CSS3, JavaScript, ES6, React, and so on including their modern frameworks and libraries. Am always interested to learn new technologies. Am ready to work independently or as a part of a team immediately.

Experience

React.JS Developer at **Non Academy (Intern)**
An Ed-tech company
Dhaka, Bangladesh
Responsibilities: Building their own website (Frontend)
Working with HTML, CSS, Bootstrap, Tailwind CSS, React.JS
October, 2022 - Present

Skills

Expertise: HTML5, CSS3, Bootstrap5, Tailwind CSS, daisyUI
Comfortable: JavaScript, ES6, React, React Router, Rest API, JSON
Familiar: React hook form, React Query, Reg Ex, Axios, Node.js, Express.js, JWT, TypeScript, MongoDB
Tools: Figma, GitHub, Google Firebase, Heroku, Netlify, VS code, Chrome devtools

Projects

Bike Buddies – a manufacturer website Live Site | Client Site | Server Site
- Admin Dashboard where an admin can see order history, payment history, all users, manage products, stock products, make new admin, etc.
- Users can order products but it's required to order a minimum range of products here, able to see their own order history, update profile, and log in/sign up here.
- Online payment system for users (implementing).

Technologies: React.js, Tailwind CSS, daisyUI, Node.js, Express.js, MongoDB, Firebase Authentication

Mega Grocery – a grocery dealer website Live Site | Client Site | Server Site
- A grocery dealer can log in/sign up here, update or restock any product, able to see available products.
- Able to add new products and after adding a new product it will be shown on the homepage.
- If any products are stocked out, then the dealer can delete that product from the site.

Technologies: React.js, Bootstrap, Node.js, Express.js, MongoDB, Firebase Authentication

Dental Solution – a single person based website Live Site | GitHub
- Users can log in/sign up here easily using mail & password or by a social login system.
- A user is able to make an appointment for his/her treatment from a specialist and confirm the appointment by checking out with the required information.
- Users are able to see all services as well as service details including service price but it's required to be logged in here for making an appointment.

Technologies: React JS | Bootstrap

Education

B.Sc. in CSE at North Western University, Khulna
Graduated: December, 2021

Courses

- Complete Web Development with Jhankar Mahbub at Programming Hero
Duration: 6 months
- HTML,CSS & Bootstrap at Bohubrihi
Duration: 4 months
